

Feasibility as a Service from Consulting & Analytics

OPTIMIZE TRIALS WITH DATA-DRIVEN
FEASIBILITY ASSESSMENTS FOR SUCCESS

Maximize clinical trial success with Feasibility as a Service (FaaS)

Determine the odds of success for your planned clinical trial with Feasibility as a Service (FaaS) from the Consulting & Analytics experts at Citeline. Using best-in-class global research data for sites, patients, and investigators, our Consulting & Analytics professionals deliver insights that begin at a macro level and drill down into granular details, uncovering the most advantageous choices for your trial.

Optimize & accelerate your study

Support your feasibility strategy at any stage, from protocol design to patient engagement and recruitment. Use Citeline's FaaS for impartial, expert feedback that empowers you to:

Inform your decision-making with an objective, 360° view of your study's feasibility, backed by extensive clinical analysis expertise.

Understand market and site considerations at a macro level and from historical perspectives.

Gain insight into potential investigators' individual trial experiences and their access to the right patient populations for your study.

Consider unbiased feasibility recommendations drawn from patient referral patterns, treatment algorithms, and site capacity and capability.

Receive data insights in the format you require, from raw data to dynamic, visualized forms.
